14 JAN 1964

MEMORANDUM FOR: Sensor Systems Division, OSA

SUBJECT : Proposal for Mobile Test Wagon for Type I Equipment

1. Attached is a proposal from Perkin-Elmer for a Mobile Test Wagon for Type I Equipment. This wagon is to be used as a go-no-go test cart for pre-fighting the camera just prior to installing it in the aircraft. It is intended for use either at the South Pad Complex or at a deployment site.

2. Request you evaluate this proposal and give us your comments. It appears that a Headquarters position needs to be established as to the technical feasibility of transporting the Type I and Type II configurations from the PE building to the South Pad for loading into the aircraft.

3. The estimated cost of one test wagon is \$80,000.00. Each succeeding wagon is \$63,000.00. Lead time is five months. Please give us your recommendation on the number to be procured.

25X1A

Chief, Materiel Division
OSA-DD/S&T

Attachment - 1

25X1A Proposal as noted above
